SUMMARY

Creative Full-Stack developer passionate about constantly learning new things has led to a recent bootcamp certification from Vanderbilt. This demonstrates a desire to stay current on latest technologies being used in IT. Past experience includes the following career paths: data analyst, implementations analyst, front-end web developer and project manager. Though all different careers they have a common theme of healthcare, data & IT. Strongly believe that planning and attention to details are critical before starting any project.

TECHNICAL SKILLS

PROGRAMMING LANGUAGES: JavaScript, Java, Caché ObjectScript, C#
LIBRARIES: jQuery, React
RUNTIMES: Node
MARKUP & QUERY LANGUAGES: CSS3, HTML5, SQL
DATABASES: SQL Server, MySQL, Firebase, MongoDB, Cache
APPLICATIONS: Illustrator, Photoshop, Microsoft Office, MS Visio, PowerPoint, Excel, Microsoft Project

TECHNICAL PROJECTS

- Abode Organizer - https://github.com/missybarringer/Project-3 - https://project-3-vbc.herokuapp.com/

  A home organization app that helps you keep track of recurring home item purchases and when they are due to be re-stocked. Responsibilities: Project management, database CRUD operations, Github repository, Heroku deployment, graphic design, routing, database seeding Technologies: Mongoose, Axios, React, Victory charts, Express, Node, Mongoose, Bcrypt, Passport

PROFESSIONAL EXPERIENCE

- Created weekly projects & apps at Vanderbilt's Full-stack bootcamp since January 2019. Participated in multiple group projects as well. Examples can be viewed on Github https://github.com/missybarringer.

  Key Accomplishments: See Technical Projects

- Implementations manager for LIMS systems and Web Portals in clinical, forensic, and pain management laboratories. Lead on-site LIMS implementations, which included: creating & deploying Web portals, testing & QA, setting up both SQL and Cache databases, data extraction, mapping, migration, HL7 interfaces, instrument interfaces.

  Key Accomplishments: Partnered with over 30 laboratories and increased their speed and efficiency by automation. Typically reduced the labs turnaround times by 50%. Gave the labs scalable tools that allowed them to grow and expand rapidly. Created custom adhoc reports and/or interfaces to increase productivity & meet any regulatory reporting needs.

- Initiated and implemented Quality Analysis for nineteen HCA database deliverables containing over 350,000 items at Medibuy. Provided leadership and feedback to Clinical Data Specialists.

  Key Accomplishments: Reduced the returned items from HCA by over eighty percent.
